Profile

Goal-oriented Frontend Developer with a strong focus on UX/UI and Design Systems, passionate about creating modern, accessible, and user-centered web experiences. By combining a background in architecture with technical skills in React, JavaScript, and frontend development, I design and build intuitive digital solutions with attention to both functionality and visual detail.

Education

Frontend Developer (*ongoing*)

Nackademin, Stockholm | 2025–2026

Focus on modern frontend development, UX/UI design, React, Next.js, accessibility, and Agile methodologies in cross-functional teams.

Bachelor's Degree – Architecture

Asrar Institute, Mashhad, Iran | 2007–2012

Skills

Frontend & UX/UI: JavaScript, HTML & Semantic Web, CSS / SCSS, Flexbox & CSS Grid
Responsive Web Design, REST APIs & JSON, Strapi CMS, UX/UI Design, Figma
Design Systems & Component Libraries, Accessibility (WCAG), Git & GitHub
Agile Methodologies (Scrum/Kanban), SEO & Web Performance
Tailwind CSS (Currently Learning), Next.js (Currently Learning)
React and Typescript (Currently Learning)
AI-assisted Development Tools

Soft skills: Problem-solving, agile collaboration, Prototyping, Component Design, Wireframing.

Tools & Languages: Git/GitHub, Microsoft Office | Swedish, English, Farsi.

Professional Experience

Frontend Developer

Developed data-driven user interfaces in React through API integrations with Strapi CMS, working with REST APIs, JSON data, authentication, and CRUD operations for user profiles and rating systems.

Designed and implemented accessible user interfaces using semantic HTML and accessibility best practices, achieving Lighthouse accessibility scores above 90.

Applied component-based thinking and UX/UI principles in Figma to create scalable components, user flows, and consistent visual systems.

Collaborated in Agile teams of 3–5 members, participating in sprint planning, problem-solving sessions, and code reviews to deliver responsive web applications using modern JavaScript.

Improved web performance and SEO through responsive image handling, semantic markup, and efficient CSS using Flexbox and Grid.

Built modern frontend applications with React, CSS, and SCSS, while continuously expanding my skills in technologies such as Tailwind CSS and Next.js.

Kitchen Designer / Key Account Manager (JKE Design) October 2021 – December 2024
Electrolux Home, Götgatan

Created customer-focused design solutions by combining aesthetics, functionality, and user needs throughout the entire design process.

Managed client relationships, consultations, quotations, and project coordination from concept to final delivery.

Applied strong visual communication, layout design, and problem-solving skills to deliver high-quality interior design projects.

Worked closely with customers and stakeholders to ensure excellent service, attention to detail, and successful project outcomes.

Kitchen Designer & Project Coordination Responsibilities June 2021 - October 2021
Kvik Bredden

Homestylist January 2021 – June 2022
Insyn Interiör, Stockholm
